

SYLLABLE TYPES

EXACT TEKS WORDING (FROM TEA)

“demonstrate and apply spelling knowledge by spelling multisyllabic words with closed syllables; open syllables; VCe syllables; vowel teams, including digraphs and diphthongs; r-controlled syllables; and final stable syllables”

WHAT DOES THIS MEAN TO ME?

A compound word is two words joined into one.

Each smaller word inside the compound keeps its own syllable type.

When I can split the compound into its two words, I can read each part.

THIS WEEK'S FOCUS

Compound Words

from “Henry Ford: Visionary of Travel”

A compound word is two smaller words put together, as in everyday, into, and something. Each part keeps its own syllable type. This week we study compound words from Henry Ford.

This deck teaches **compound words** across the five RPLD thinking levels:

NOTICE → CHOOSE → SHOW → OWN → DEFEND.

COMMON MISCONCEPTION

Students may write a word without naming all the parts. Require the two smaller words inside it.

▶ Reveal the answer slide one row at a time. Have students check their own tracking sheets.

"If you missed one, that is where your learning is. Go back to the word and find the pattern."

▶ Celebrate students who explained the rule, not only students who named the word.

CHECK FOR UNDERSTANDING

Students can explain the rule, not just name the word.

COMMON MISCONCEPTION

Naming the word without the two smaller words inside it. Ask how and why for at least two answers.

POSSIBLE STUDENT QUESTION

Why not just memorize the list? Because readers meet new words in books and tests, and the rule reads them.

RPLD EVIDENCE & ADVICE

Reviewing is where OWN turns into DEFEND. Push for the two smaller words inside it.

RAISE THE THINKING

Ask a student to explain what would change if the syllable type were different.

COMMON MISCONCEPTION

Choosing by guess or by a word they like. Check the pattern in each choice.

POSSIBLE STUDENT QUESTION

RPLD EVIDENCE & ADVICE

- A families**
Families is one word with the plural -ies ending. It is not two words put together.
